

Education

University of California, Riverside

June 2019

- B.S. in Computer Science | GPA: 3.4 / 4.0
- Relevant Courses: Computer Graphics, Virtual Reality, Software Engineering, Operating Systems, Linear Algebra, Multivariable Calculus, Physics, Data Structures & Algorithms, Machine Learning

Skills

- C++, C#, Python, Git, OpenGL, Unity 3D, Matlab, Android SDK, Maya, Photoshop, LaTeX, Agile Methodologies, Scrum, Mac OSX, Windows, Linux, Vim, Computer Graphics, Virtual Reality

Professional Experience

Visiting Researcher: Real-time Rendering for Virtual Humans

June 2018 - Aug. 2018

University of Southern California Institute for Creative Technologies. Playa Vista, CA

- Developed blend-shape (animation) pipeline in C# to view and animate facial rigs in Unity 3D
- Coded a graphical user interface using python scripts to animate facial scans
- Parsed data files efficiently in C++ containing vertices of various facial expressions
- Updated the pipeline's developments through a git repository

Computer Graphics Assistant. UC Riverside. Riverside, CA

Jan. 2018 - Feb. 2018

- Programmed POV-Ray test scripts to render OpenGL and PhysBAM simulation examples
- Collected and compiled photo stills using Linux/Unix commands to produce movie files
- Organized a Kanban board to communicate status of renderings

Technical Projects

VR Vapors. Google Cardboard Virtual Reality Developer

July 2019 - Present

- Coding wave and particle visualizations based on song frequencies in C# through Unity

Ball Hero. Unity 3D Game Developer

Apr. 2019 - June 2019

- Led a team of 5 in creating a 3D rolling ball game using a scrum framework
- Developed in-game enemies with C# scripts

Pómo. Independent Study: Technical Director

Jan. 2019 - March 2019

- Illustrated storyline and concept art for various assets and characters of an original animated short
- Wrote Python scripts for character rigging and animation using Maya's API

Carnival Games. Virtual Reality Game Developer

Sept. 2018 - Dec. 2018

- Collaborated with a team of 3 to assemble the game logic in C# and Unity for Oculus Rift
- Designed 3D Ball Toss game assets in Maya and Unity
- Maximized an immersive gaming experience by including sound effects and visual stimulation

R'Park. Android Developer

Sept. 2018 - Dec. 2018

- Directed a team of 4 in building an Android app that assists students find parking at UC Riverside
- Generated parking trends in Java from university's servers using data stored in Google's Firebase
- Led the team in user interface design choices using Material-UI in Android's XML files

Volunteer

- SIGGRAPH Student Volunteer. Los Angeles, CA

July 2019 - Aug. 2019
